**Score Card Data Quality**

**Category : General League News**

**Published by John Alsop [\[Admin\]](#) on 08/12/16**

This season has seen an unprecedented increase in the number of score cards that are being submitted without team names. Other issues experienced have been teams entering just christian names. This all adds to the work of the volunteer administrators and fixture secretary. If you wish to keep the goodwill of these people and continue to have a responsive results service then please complete the score cards correctly. Sanctions against offending teams are not currently under discussion by the committee but if standards continue to drop then this will have to be reviewed. In addition, the quality of the images sent electronically has generally been poor. Images should be at least 1024 pixels wide and taken in good lighting conditions i.e. on the match table top without shadows and in focus. Thank you for your assistance in helping the league run efficiently and professionally albeit by amateur volunteers.
